Installation instruction

Place the top of the AD2100F rail mount over the top of the DIN rail. Tilt the bottom of the AD2100F toward the DIN rail until it snaps into place.

To remove the AD2100F from the DIN rail, use a flathead screwdriver to pull down the bottom of the rail mount and tilt it away from the DIN rail.

To install AD2100F on wall/plate, loosening screws on mounting bracket and pull both brackets out first. Then re-screwing the two brackets with screws onto wall/plate.

The left housing of AD2100F is designed as a heat sink, please keeping a minimum distance of 15mm from each other.
